

# **GHOSTD Corporation Identity Governance Program – Phase 4 Leaver Process**

## **1. Executive Summary**

This phase demonstrates the Leaver process within the GHOSTD Corporation Identity Governance Program. Following a prior onboarding and department transfer event, employee Candace Jones was terminated and all associated access was removed according to organizational offboarding procedures. Identity governance controls were executed to disable the account, revoke group memberships, remove application access, and validate that no residual permissions remained. This phase demonstrates the completion of the Joiner-Mover-Leaver (JML) lifecycle within Microsoft Entra ID.

## **2. Business Requirement**

Employee: Candace Jones

Role: Finance Analyst

Department: Finance Department

Termination Date: June 21, 2026

### **Required Action:**

#### **Disable Identity**

- Block sign-in
- Disable account

#### **Remove Group Memberships**

- All Employees
- Finance Team

#### **Remove Application Access**

- Slack
- Workday
- Netsuite

#### **Validate Removal**

- Confirm no active access remain

### 3. Scope Completed

| Area                 | Completed |
|----------------------|-----------|
| Account Disablement  | Yes       |
| Group Removal        | Yes       |
| Application Removal  | Yes       |
| Access Validation    | Yes       |
| Leaver Documentation | Yes       |

### 4. Implementation Steps

#### Step 1 — Disable Candace Jones Account

Before:

3

## After:

The screenshot shows the Microsoft Entra admin center interface. The left sidebar contains navigation links for Home, Security Copilot agents, Security Copilot chat, Favorites, and a list of categories including Entra ID, Groups, Devices, Agents, Enterprise apps, App registrations, Roles & admins, and Delegated admin partners. The main content area displays the user profile for Candace Jones, who is a user in the GHOSTD CORPORATION (CAMU...) organization. The user's status is 'Disabled'. The profile is divided into several sections: Overview, Monitoring, and Properties. The Properties section is further divided into Identity, Contact Information, Parental controls, Settings, and On-premises. The user's email address is camjohnson78@outlook.onmicrosoft.co, and their phone number is 181b899d-5be6-49a3-bc2f-02... The user's job title is Finance Analyst, and their company is GHOSTD Corp. The user's employee ID is GHC027, and their employee type is Full-Time. The user's employee hire date is Jun 18, 2026, 12:00 AM. The user's office location is Remote, and their manager is Mia Carter. The user's on-premises sync is enabled, and their on-premises last sync date time is Jun 18, 2026, 12:00 AM. The user's on-premises distinguished name is Extension attributes, and their on-premises immutable ID is On-premises provisioning errors. The user's on-premises SAM account name is On-premises security identifier, and their on-premises user principal name is On-premises domain name.

## What Was Done:

The Candace Jones account was disabled immediately following employment termination.

## Why It Matters:

Prompt account disablement prevents unauthorized access and reduces the risk of orphaned accounts remaining active after employee departure.

## Evidence:

- Disabled account screenshot
- User status showing account disabled

## Step 2 — Remove Group Memberships

Before:

The screenshot shows the Microsoft Entra admin center interface. The left sidebar contains navigation links for Home, Security Copilot agents, Security Copilot chat, Favorites, Entra ID, Overview, Users, Groups, Devices, Agents, Enterprise apps, App registrations, Roles & admins, and Delegated admin partners. The main content area is titled 'Candace Jones | Groups' and shows a list of groups that Candace Jones is a member of. The list has columns for Name, Object Id, Group Type, Membership Ty..., Email, and Source. Two groups are listed: 'All Employees' and 'Finance Team'. Both groups are of type 'Security' and have a membership type of 'Assigned'.

| Name          | Object Id             | Group Type | Membership Ty... | Email | Source |
|---------------|-----------------------|------------|------------------|-------|--------|
| All Employees | 3df05de8-2fad-47b1... | Security   | Assigned         |       | Cloud  |
| Finance Team  | a75e3ff7-a696-440d... | Security   | Assigned         |       | Cloud  |

After:

The screenshot shows the Microsoft Entra admin center interface. The left sidebar is the same as in the 'Before' screenshot. The main content area is titled 'Candace Jones | Groups' and shows a list of groups that Candace Jones is a member of. The list has columns for Name, Object Id, Group Type, Membership Ty..., Email, and Source. The message 'Not a member of any groups' is displayed in the list area.

| Name                       | Object Id | Group Type | Membership Ty... | Email | Source |
|----------------------------|-----------|------------|------------------|-------|--------|
| Not a member of any groups |           |            |                  |       |        |

### What Was Done:

All security group memberships associated with Candace Jones were removed.

### Why It Matters:

Removing group memberships eliminates inherited permissions and prevents future access through role assignments.

### Evidence:

- Before membership screenshot
- After membership screenshot

## Step 3 — Remove Application Access

Before:

The screenshot shows the Microsoft Entra admin center interface. The left sidebar contains navigation links for Home, Security Copilot agents, Security Copilot chat, Favorites, and Entra ID. The main content area displays the 'Candace Jones | Applications' page. A search bar is at the top, followed by a table of application assignments. The table has columns for Name, Role, Assignment, and Date. Three applications are listed: Workday, Slack, and Netsuite, all with the role 'User' and assigned directly.

| Name     | Role           | Assignment        | Date      |
|----------|----------------|-------------------|-----------|
| Workday  | Default access | Directly assigned | 6/19/2026 |
| Slack    | User           | Directly assigned | 6/18/2026 |
| Netsuite | User           | Directly assigned | 6/19/2026 |

After:

The screenshot shows the Microsoft Entra admin center interface after removing application assignments. The left sidebar is the same as the previous screenshot. The main content area displays the 'Candace Jones | Applications' page. The search bar is at the top, and the table below it shows 'No application assignments found.'

| Name                              | Role | Assignment | Date |
|-----------------------------------|------|------------|------|
| No application assignments found. |      |            |      |

### What Was Done:

All application assignments were removed from the terminated employee account.

### Why It Matters:

Removing application assignments ensures access to business systems is revoked immediately upon termination.

### Evidence:

- Before application assignment screenshot
- After application assignment screenshot

#### Step 4 — Validate Termination

| Control                 | Expected State | Actual State | Result |
|-------------------------|----------------|--------------|--------|
| Account Enabled         | No             | No           | Pass   |
| All Employees           | Removed        | Removed      | Pass   |
| Finance Team            | Removed        | Removed      | Pass   |
| Workday                 | Removed        | Removed      | Pass   |
| NetSuite                | Removed        | Removed      | Pass   |
| Slack                   | Removed        | Removed      | Pass   |
| Active Access Remaining | None           | None         | Pass   |

#### Phase 4 Outcome

**Result:** Successful

Candace Jones was successfully offboarded from GHOSTD Corporation following completion of the employee termination process.

Identity governance controls were executed to disable the user account, revoke group memberships, remove application access, and validate that no active permissions remained following termination.

##### Account Status

- Account Disabled: Yes
- Sign-In Blocked: Yes
- User Access Removed: Yes

##### Access Removed

##### Security Groups

- All Employees
- Finance Team

## **Applications**

- Workday
- NetSuite
- Slack

## **Security Impact**

The terminated employee no longer possesses access to corporate identities, security groups, or enterprise applications within the GHOSTD Corporation environment.

The termination process reduced the risk of unauthorized access, orphaned accounts, and excessive privileges by ensuring all access was revoked in accordance with Identity Governance policies.

## **Final Conclusion**

The Leaver process was completed successfully. All identity, group, and application access associated with Candace Jones was removed and validated. No residual access or toxic privilege conditions were identified following termination.
